 Anshu Kumar

 Anshu3721

PROFILE

Data Scientist with 3 years of experience designing and deploying **production-grade ML and NLP** solutions that **automate complex business workflows**, reduce processing time by over 85%, and deliver intuitive web-based decision tools. Skilled in **Python, SQL, Flask/FastAPI, EDA, classification, regression, feature engineering, hyperparameter tuning**, and NLP (**spaCy, Gemini API**). Proven ability to translate business problems into scalable, real-time ML solutions.

EXPERIENCE

Elikem Softwares Pvt. Ltd. (client -Nokia), Data Analyst

09/2023 – present

- Designed and deployed Flask web apps for telecom KPI analysis, delivering **interactive geospatial dashboards** (Folium) that enabled **real-time performance tracking** and improved network planning decisions.
- Engineered **topology visualization tools** (NetworkX, Pyvis) for **real-time L2/L3 diagnostics**, reducing manual analysis and accelerating infrastructure upgrades.
- **Automated high-volume Excel ETL workflows** (50K+ rows) with Python (Pandas, Openpyxl), reducing processing time from hours to minutes and ensuring data accuracy for critical telecom reporting.
- Led **end-to-end rule-based automation initiatives**, cutting manual effort by up to **95%** while standardizing data quality and reporting workflows across teams.

Eagletfly Solutions, Data Analyst

07/2022 – 07/2023 | New Delhi

- Developed **Python automation frameworks** to process high-volume telecom datasets, **cutting analysis time by 90%** and enabling faster, more reliable reporting for business teams.
- Built **scalable real-time data validation and transformation pipelines**, enhancing **operational efficiency** and delivering cleaner, analysis-ready data for critical business decision-making.

TECHNICAL SKILLS

- **Data Science & Analytics:** Exploratory Data Analysis, Machine Learning, Automation, NLP & Tokenization
- **Python Packages and Frameworks:** Scikit-Learn, Numpy, Pandas, Matplotlib, Seaborn, Plotly Express, Openpyxl, XlsxWriter, Flask
- **Cloud Platforms:** Google Cloud Platform (GCP)
- **Databases:** MySQL, PostgreSQL
- **Analytical and BI Tools:** Apache Superset, Power BI, Microsoft Excel

PROJECTS

Contract Clause Extraction Tool with AI Assistant, (Tools: Python, Flask, spaCy, Google Gemini API) 

- **Problem:** Manual identification & interpretation of legal clauses in contracts was slow & inaccessible to non-legal users.
- **Action:** Delivered an **NLP-driven Flask app** (spaCy, Gemini API) for clause extraction from PDF/TXT contracts with **real-time chatbot** explanations.
- **Impact:** Reduced review times by 90% (to under 5 minutes), **streamlined legal workflows**, and provided **self-service access** for business and sales teams.

Credit Risk Scoring System with Interactive UI, (Tools: FastAPI, Streamlit, Docker, Docker Compose) 

- **Problem:** Manual credit risk assessment was slow (30–60 min/applicant), error-prone, and inconsistent across ~200+ monthly applications.
- **Action:** Implemented a **containerized FastAPI service** with a **Random Forest** model and **Streamlit UI** for real-time, standardized scoring.
- **Impact:** Cut assessment time by **85%** (under 5 min), improved consistency, and streamlined workflows for loan officers.

LICENSES & CERTIFICATES

Data Science & Analytics
Eagletfly Solutions

Complete Python Pro
Bootcamp
Udemy

LangChain for LLM
Application
Development 

ChatGPT Prompt
Engineering for
Developers 

EDUCATION

Master of Science in Applied Statistics, IGNOU

2024 – Present

Bachelor of Science in Mathematics, Sido Kanhu Murmu University

06/2016 – 07/2019
